Environment

Competency **Supports a successful business by ensuring the efficient use of water that enhances the quality of production, the health of humans and animals and environmental benefits**

Knows and understands key points of legislation regarding water usage.

Complies with the legislative requirements for water use.

Knows and understands that soil erosion can be reduced through soil management techniques.

Knows and understands that pollution risk areas are a threat to water quality.

Identifies areas where water is lying on the surface, poaching problems are evident and erosion has occurred.

Job title

Calf rearer

Identifies the main activities that may create a risk to water quality.

Knows and understands how the business's waste water and effluent system works and ensures good practice on-business.

Assists with identification of areas where water could be saved.

Implements, mechanisms and techniques for collecting clean water.

Complies with any legal requirements for water use.

Identifies and reports leaks and implements emergency procedures to avoid wasting water.

Follows an irrigation schedule to enhance crop growth and yield.

Follows plans for accurate applications of all inputs to ensure that water pollution is avoided.

Identifies the pollution risks that may impair water quality.

Recognises areas prone to flooding and drought.

Follows relevant management practices to ensure soil erosion does not occur.

Quality and Control

Competency **Supports a successful business through application of knowledge and skills to control the quality of business production.**

Knows and understands the importance of traceability.

Knows and understands the procedures and controls to ensure all products meet the standards as stipulated in the Quality Assurance Manual and Food Safety Field Operations Manual.

Ensures all products meet the standards as stipulated in the Quality Assurance Manual and are delivered in a timely manner.

Knows and understands the importance of traceability.

Knows and understands customer requirements and their impacts on crop production.

Knows and understands the procedures and controls to ensure all products meet the standards as stipulated in the Quality Assurance Manual and Food Safety Field Operations Manual.

Knows and understands customer requirements and their impacts on farm produce production.

Financial Management

Competency **Supports a successful business through knowledge and skills which ensure financial sustainability.**

Knows and understands the costs associated with jobs on-business.

Knows and understands benchmarking and key pieces of data for the business.

Knows and understands the costs associated with jobs on-business.

Knows and understands, in general terms, business income and expenses.

Knows and understands, in general terms, business income and expenses.

Develops and monitors own personal budgets and finances to achieve financial targets.

Knows and understands benchmarking and key pieces of data for the business.

Environment

Competency **Supports a successful productive and sustainable business through knowledge and skills which promote good environmental practice.**

Ensures the optimal use of valuable by-products and separate clean and dirty water to minimise pollution risks.

Follows plans and adheres to targets to reduce emissions and energy use.

Job title

Calf rearer

Knows and understands the impact of key pollutants on the environment, animal and human health, and local communities.

Knows and understands the legislation with regard to odour and the impact on neighbours.

Applies precision business techniques to optimise nitrogen fertiliser inputs to reduce whole business energy usage.

Assists with the monitoring of energy use and cost.

Knows and understands the impact of Greenhouse Gas Emissions (GHGs) on climate change and the government agenda (Net Zero).

Demonstrates an understanding of, and willingness to apply, environmental management and Integrated Pest Management (IPM) principles.

Knows and understands the principles of the waste hierarchy as related to the business and is able to adhere to the waste management plan.

Demonstrates an awareness of, and complies with, the regulations governing the control of pollution from relevant facilities and materials on the business.

Complies with Duty of Care and other waste regulations.

Ensures that all legislation is complied with as instructed.

Works safely and effectively to reduce environmental impacts.

Knows and understands the rules and regulations concerning gun safety, and if appropriate, has a gun licence.

Recycles waste where possible and dispose of non-recyclable waste in accordance with best practice.

Knows and understands that slurries and manures are not deemed as waste, if spread for agricultural benefit.

Fosters good relations with the local community to communicate the benefits of Integrated Farm Management (IFM).

Assists with the identification of key habitats and audit biodiversity on the business.

Complies with requirements and consent conditions relating to pollution control.

Ensures waste is minimised and resources are used efficiently.

Undertakes hedge cutting and ditch clearing to minimise the impact on flora and fauna.

Complies with the regulations around plastic waste (Reduce, Reuse, Recycle).

Knows and understands the implications of the duty of care for EC Waste Framework Directive, Hazardous Waste regulations.

Assists with the creation of a plan to encourage greater biodiversity and conserve habitats, and involve staff and contractors in conservation planning and implementation.

Knows and understands the legislation with regard to predators and vermin control.

Business Sustainability

Competency **Supports and enhances a successful business through the use of knowledge and skills following strategic and operational plans.**

Knows and understands how their role and actions contribute to the efficiency of how the business operates.

Assists in improving the performance of the production system through good communication and operational best practice.

Knows and understands the value of accurate record keeping and effectively maintains records for which they have responsibility.

Knows and understands how their role and actions contribute to the efficiency of how the business operates.

Job title

Calf rearer

Identifies and acts on opportunities for operational improvement.

Knows and understands how to access business policies and procedures, and can effectively follow these as directed.

Knows and understands appropriate record keeping requirements as per business policy.

Knows and understands appropriate record keeping requirements as per business policy.

Knows and understands how to access business policies and procedures, and can effectively follow these as directed.

Knows and understands the value of accurate record keeping and effectively maintains records for which they have responsibility.

Nutrition

Competency

Supports successful livestock production through knowledge and skills that ensure animals receive high quality feed regimes which sustainably enhance production.

Knows and understands the importance of not letting stock graze following spraying until safe to do.

Knows and understands the type and amount of feed that should be on offer to the different ages classes of livestock and knows what good quality feed, and feed damage, looks like.

Knows and understands common poisonous weeds and the importance of correctly controlling with either agrochemicals or using hand held or mechanical equipment.

Knows and understands how the feed requirements of an animal changes with their stage of production, and in the case of youngstock, by age and weight.

Knows and understands the importance of not letting stock graze following spraying until safe to do.

Assist with the moving of fencing in the grazing system.

Knows and understands the type and amount of feed that should be on offer to the different ages classes of livestock and knows what good quality feed, and feed damage, looks like.

Knows and understands the main points of body condition measuring and can relate general condition of the stock to their age and stage of production.

Assists with feeding livestock, as directed.

Helps to ensure that animals receive adequate feed quantity and quality, including access to a daily supply of clean drinking water.

Assists with maintaining optimum grazing conditions, including weed control under direct and personal supervision and where appropriately licensed to do so.

Knows and understands how the feed requirements of an animal changes with their stage of production, and in the case of youngstock, by age and weight.

Assists with loading feed equipment, as directed.

Knows and understands common poisonous weeds and the importance of correctly controlling with either agrochemicals or using hand held or mechanical equipment.

Knows and understands the main points of body condition measuring and can relate general condition of the stock to their age and stage of production.

Observes in-shed feeding systems and reports issues to senior staff.

Husbandry

Competency

Supports successful livestock production through knowledge and skills that ensure successful livestock husbandry.

Knows and understands the procedures of humane slaughter including timeliness and correct methods of euthanasia for relevant livestock classes.

Knows and understands the biosecurity risks presented by visitors, other animals and equipment shared with other farms, knows where visitors should park and disinfection practices.

Knows and understands the signs of female animals about to give birth and understands basic animal anatomy and the principles of how animals function.

Knows and understands the procedures of humane slaughter including timeliness and correct methods of euthanasia for relevant livestock classes.

Complies with farm animal health plan/ policy, in particular biosecurity.

Assists with implementing or administering animal health treatments as directed.

Knows and understands procedures for segregation within the group and the procedure for isolation away from the group if infectious condition suspected.

Knows and understands the Five Freedoms. In particular, the moving of livestock and handling of livestock is done safely and with the minimum of stress and risk of injury to the animal and staff.

Knows and understands the biosecurity risks presented by visitors, other animals and equipment shared with other farms, knows where visitors should park and disinfection practices.

Knows and understands the importance that husbandry activities such as foot bathing, foot trimming, vaccination and routine worming play in maintaining animal health and welfare and preventing disease.

Knows and understands the importance of compliance with veterinary medicines storage requirements, accurate estimation of bodyweight, accurate measurement of dose, withholding periods, use by dates and use by after first opening dates and farm animal health

Knows and understands the importance of record keeping and recording everything as per animal health plan in the medicine book.

Knows and understands procedures for segregation within the group and the procedure for isolation away from the group if infectious condition suspected.

Assists senior staff with calving/lambing/farrowing, as directed.

Knows and understands the signs of female animals about to give birth and understands basic animal anatomy and the principles of how animals function.

Knows and understands the importance of record keeping and recording everything as per animal health plan in the medicine book.

Recognises normal livestock health and identifies key health issues and abnormal behaviour, and reports these to senior staff.

Recognises when stock do not respond to treatment or where sickness or injuries require emergency euthanasia and promptly refers these to senior staff and/or carries out euthanasia if appropriately trained and confident, as per agreed farm animal health plan

Recognises sickness or injuries to animals that require attention and promptly refers these to senior staff and/or administers treatment if appropriately trained and as per agreed farm animal health plan.

Knows and understands the importance that husbandry activities such as foot bathing, foot trimming, vaccination and routine worming play in maintaining animal health and welfare and preventing disease.

Knows and understands the basic signs of health and basic signs of disease and typical normal and abnormal behaviours.

Keeps records of animal treatments in line with farm protocols and procedures.

Demonstrates an attitude that is caring towards animals and assists with moving and handling livestock in a way that shows empathy and care for the animal.

Knows and understands the Five Freedoms. In particular, the moving of livestock and handling of livestock is done safely and with the minimum of stress and risk of injury to the animal and staff.

Job title

Calf rearer

Knows and understands the importance of compliance with veterinary medicines storage requirements, accurate estimation of bodyweight, accurate measurement of dose, withholding periods, use by dates and use by after first opening dates and farm animal health

Knows and understands the basic signs of health and basic signs of disease and typical normal and abnormal behaviours.

Beef, Dairy

Competency

Supports successful production of cattle through knowledge and skills that support and enhance the business.

Carries out tagging following procedures.

Knows and understands the requirements for tagging and why it is important.

Assists with calf disbudding.

Knows and understands the requirements for tagging and why it is important.

Knows and understands the methods for disbudding and that anaesthetic must be used, and that chemical cauterisation can be undertaken in the first week of life only.

Knows and understands the methods for disbudding and that anaesthetic must be used, and that chemical cauterisation can be undertaken in the first week of life only.

Knows and understands that castration without anaesthetic can be carried out with rubber ring within the first week of life only.

Knows and understands that castration without anaesthetic can be carried out with rubber ring within the first week of life only.

Assists with bull calf castration.

Technology, Machinery and Vehicles

Competency

Supports successful technical operations through knowledge and skills of technology, machinery, vehicles and structures that enhances production and business viability.

Knows and understands how to operate machinery safely.

Holds certificates where needed and has undergone appropriate training to operate storage, warehouse and packhouse machinery used on farm.

Knows and understands the value of collecting good quality data and how it can be used to make decisions.

Knows and understands how to safely operate a light utility vehicle (LUV), with trailed equipment or a mounted load, on flat or hilly terrain.

Knows and understands how to select correct fuel when operating vehicles and machinery.

Knows and understands how to use technology-based systems to collect data to improve efficiency of operations.

Demonstrates experience using computers, smartphones, and apps.

Knows and understands which driving licences are needed and when the renewal period is due, relevant to the job.

Knows and understands how to adapt their driving giving due care, respect and attention to conditions (slope, wet, etc), risks (overhead power cables, low buildings etc) and when towing loads.

Knows and understands basic vehicle maintenance and operation, including setting up and calibration to achieve required results.

Knows and understands how electronic systems work on-farm and what their role is.

Knows the importance technology plays within the industry and the opportunities available to them to use technology.

Uses and looks after fencing tools effectively.

Wears a suitable helmet when using an ATV.

Checks and drives a basic wheeled tractor with an attached implement on flat or hilly terrain.

Demonstrates appropriate instruction, training and certificates for driving vehicles used on farm.

Applies the value of collecting good quality data and how it can be used to make decisions.

Holds a current and relevant driver's licence.

Develops strategies to manage personal and external factors that may contribute to injury at work.

Knows and understands how to adapt their driving giving due care, respect and attention to conditions (slope, wet, etc), risks (overhead power cables, low buildings etc) and when towing loads.

Ensures responsible driving giving due care, respect and attention to others on site and on roads.

Knows and understands which driving licences are needed and when the renewal period is due, relevant to the job.

Knows and understands basic vehicle maintenance and operation, including setting up and calibration to achieve required results.

Knows and understands the business security process.

Knows and understands how electronic systems work on-farm and what their role is.

Knows and understands how to use technology-based systems to collect data to improve efficiency of operations.

Knows and understands the value of collecting good quality data and how it can be used to make decisions.

Knows and understands how to safely operate a light utility vehicle (LUV), with trailed equipment or a mounted load, on flat or hilly terrain.

Knows and understands the business policy around use of mobile and smart phones for business and personal use at work.

Knows and understands how to select correct fuel when operating vehicles and machinery.

Knows and understands the business security process.

Applies the value of collecting good quality data and how it can be used to make decisions.

Knows and understands how to operate machinery safely.

Follows effective building management practices as per business policy and procedures.

Demonstrates confidence using computers, smartphones, and apps, and uses technology-based systems to collect data to improve the quality of the workplace where applicable.

Ensures familiarity with key locations.

Knows and understands the business policy around use of mobile and smart phones for business and personal use at work.

Demonstrates confidence linking technology with implements, computers, smartphones and apps, etc and collect data to improve efficiency and accuracy of operations.

Assists with erecting, maintaining and repairing electric and non-electric fences, walls and other boundaries and field separation features, as directed.

Ensures familiarity with farm layout.

Identifies problems, faults and inconsistencies requiring action.

Holds certificates or undertakes training with other farm machinery applicable to role.

Demonstrates familiarity with range of other technologies and aids on the farm.

Job title

Calf rearer

Knows the importance technology plays within the industry and the opportunities available to them to use technology.

Environment

Competency

Supports successful technical operations with knowledge and skills which ensures sustainable land use that enhances business and the environment.

Knows and understands legal requirements around water use, and reports any issues to senior staff.

Knows and understands the role nutrients play in farm systems, and the importance of good nutrient management.

Knows and understands the key points about the farm environment plan and how they contribute to it.

Knows and understands the importance of good management practice around land cultivation, and how their actions impact on the environment.

Knows and understands the need for efficient use of water.

Knows and understands that no stock are allowed in or around waterways, and reports any stock in areas they should not be to senior staff.

Assists with water-related tasks.

Knows and understands how to dispose of and tidy up farm waste.

Recruitment and Retention

Competency

Supports the business through use of knowledge and skills to fulfil employment obligations and plan career development.

Knows and understands own rights around employment agreements, minimum wage requirements, and formal accommodation agreements (where applicable), and knows how to communicate any issues to superiors.

Knows and understands all employment obligations including specific responsibilities, accommodation agreements, minimum wage requirements, records of holidays and leave, hours worked and wages paid.

Knows and understands all employment obligations including specific responsibilities, accommodation agreements, minimum wage requirements, records of holidays and leave, hours worked and wages paid.

Knows and understands own rights around work time and workload, and to a reasonable work/life balance.

Knows and understands the true hourly rate they are being paid, and that remuneration is linked to their skills and responsibilities.

Knows and understands their own training requirements for ongoing self-development, and to achieve their goals.

Focuses on their career development goals, and has a clear plan to achieve this.

Ensures accurate records are kept for leave, hours worked, and wages paid.

Knows and understands own rights around employment agreements, minimum wage requirements, and formal accommodation agreements (where applicable), and knows how to communicate any issues to superiors.

Abides by all employment obligations including specific responsibilities, accommodation agreements, minimum wage requirements, records of holidays and leave, hours worked and wages paid.

Knows and understands the true hourly rate they are being paid, and that remuneration is linked to their skills and responsibilities.

Knows and understands their own training requirements for ongoing self-development, and to achieve their goals.

Job title

Calf rearer

Knows and understands own rights around work time and workload, and to a reasonable work/life balance.

Waste Management

Competency

Supports the management of production through knowledge and skills that ensure the effective management of waste, in line with legal requirements

Knows and understands environmental protection practices of the system used for handling and storing both solid and liquid farm manures and effluents.

Prevents contamination of soil by disposing of waste products in line with legislation (waste regulations).

Complies with the regulations governing the control of pollution from relevant facilities and materials.

Knows and understands farm procedure in relation to disposal of used disinfectants,

Knows and understands the legal requirements of handling and storing both solid and liquid farm manures and effluent, and how effluent can impact the environment.

Undertakes activities with both solid and liquid farm manures and effluents in line with legislation and business policies and procedures as directed.

Knows and understands how liquid farm manure and effluent systems operate, and knows their responsibilities and what happens if problems occur.
