

**Health and Safety**

Competency **Successfully uses knowledge and skills ensuring Health and Safety is adhered to and good physical and emotional wellbeing is maintained throughout the business.**

Knows and understands the importance of personal hygiene, and the impact of zoonotic disease.

Knows and understands their own rights to a physically safe workplace.

Knows and understands health, safety and wellbeing requirements around chemical use on a business.

Knows and understands the business's responsibilities for health, safety and wellbeing in relation to land, people, and animals.

Knows and understands the importance of hydration, nutrition, and sleep in relation to personal wellbeing.

Knows and understands own rights to an emotionally secure workplace, for example one that is free from bullying, and knows how to identify bullying.

Maintains good personal health and avoids injury through the use of Personal Protective Equipment (PPE).

Knows and understands the importance of looking after team wellbeing, and can recognise if others are unwell.

Knows and understands the importance of monitoring and recording near misses.

Knows and understands the legislative requirements and codes of practice relating to the safe use of pesticides, fertiliser and other chemicals.

Knows and understands the risks of alcohol intake, poor diet, and drug use on a business.

Follows the business health and safety plan.

Maintains a high level of alertness of surroundings at all times, for example, is not under the influence of drugs or over tired.

Able to identify when First aid is needed and where to go for help.

Identifies hazards, understands safety procedures, and demonstrates safe work practices, able and trained to do a risk assessment on site to ensure each job is safe to carry out.

Assists with managing surplus mixes of agrichemicals, decontaminating, cleaning and storing equipment, and completing documentation, as directed

Knows and understands the reasons for safe manual handling in the workplace.

Takes responsibility for their own health and wellbeing, manages their alcohol intake, is drug-free and follows health and safety guidelines in the workplace.

Knows and understands to follows health and safety guidelines in the workplace.

Observes stressed behaviours in themselves and in their workmates, and reacts appropriately to these.

Knows and understands they have a duty of care to others to meet health and safety requirements in the workplace.

Knows and understands they have a duty of care to others to meet health and safety requirements in the workplace.

Knows and understands the importance of looking after team wellbeing, and can recognise if others are unwell.

Knows and understands health, safety and wellbeing requirements around chemical use on a business.

Knows and understands the business's responsibilities for health, safety and wellbeing in relation to land, people, and animals.

Job title

**General farm worker**

Knows and understands the importance of hydration, nutrition, and sleep in relation to personal wellbeing.

Knows and understands the legislative requirements and codes of practice relating to the safe use of pesticides, fertiliser and other chemicals.

Knows and understands the reasons for safe manual handling in the workplace.

Knows and understands to follows health and safety guidelines in the workplace.

Knows and understands the importance of monitoring and recording near misses.

Knows and understands their own rights to a physically safe workplace.

Knows and understands the importance of personal hygiene, and the impact of zoonotic disease.

Knows and understands the risks of alcohol intake, poor diet, and drug use on a business.

Knows and understands own rights to an emotionally secure workplace, for example one that is free from bullying, and knows how to identify bullying.

## **Leadership**

Competency

**Supports a successful business by applying knowledge and skills and engages as a successful member of a high performing team.**

Speaks, listens and shares ideas appropriately, and asks questions when unsure or unclear.

Attends and contributes to team meetings as required.

Contributes towards a workplace where open and honest communication is encouraged, and proactively manages interpersonal conflict, demonstrating respect to all team members.

Follows directions of supervisors and managers, and works well with a diverse team to complete assigned tasks and meet goals.

Supports the business owner's values to achieve the business goals.

Identifies and communicates any issues on-business to superiors.

Knows and understands their mistakes may result in consequences to their employer as well as themselves.

Knows and understands that a good business team has open and honest communication, and regular constructive feedback.

Knows and understands on-business leadership, for example, how to consider different team members and communicate to a group.

Knows and understands their mistakes may result in consequences to their employer as well as themselves.

Shows empathy and respect for people, animals and the environment, and shows care for other peoples' property.

Knows and understands the way they communicate and how it affects others.

Knows and understands on-business leadership, for example, how to consider different team members and communicate to a group.

Understands public perceptions of the industry.

Knows and understands the way they communicate and how it affects others.

Maintain the highest levels of honesty and integrity in dealing with others and carrying out work.

Thinks about consequences before they act, understands and reflects on their words, actions and behaviours, and the effect these may have.

Assists with problem solving.

Assists in increasing workforce through inspiring others to work for the business.

Inspires others in the team to have a good work ethic that increases productivity.

Job title

**General farm worker**

Knows and understands that a good business team has open and honest communication, and regular constructive feedback.

## **Strategy and Operations**

Competency **Supports a successful business by applying knowledge and skills to work independently as a high achieving business operative.**

Recognises problems and when they need to seek advice or support, and uses initiative to find or ask for solutions.

Arrives at work on time with appropriate clothing and equipment to complete a work day, completes jobs, and takes appropriate breaks (uses company clothing/equipment if provided).

Participates positively and proactively in staff training and appraisals.

Contributes to the team culture to support the business's values and goals.

Recognises mistakes made, accepts advice and learns from feedback.

Develops pride in how they contribute to their business's performance.

Identifies and assesses options before making a decision to ensure a positive outcome.

Demonstrates adaptability and flexibility in new and changing situations.

Takes into account available information to make reasoned decisions.

Knows and understands the importance of taking care of business equipment.

Demonstrates curiosity about the job, business and industry, and is motivated to work towards goals by learning new tasks, skills and information.

Knows and understands what a good work ethic is and why this is important to enhance a business.

Is self-managing and responsible, is learning to manage time well to increase efficiency.

Works in a lean and effective manner to increase financial sustainability.

Knows and understands that accuracy is important for record keeping purposes and sustainable business models.

Knows and understands the importance of sustainable practices.

Knows and understands what a good work ethic is and why this is important to enhance a business.

Knows and understands the importance of taking care of business equipment.

Knows and understands that accuracy is important for record keeping purposes and sustainable business models.

Knows and understands the importance of sustainable practices.

Uses basic literacy and numeracy skills to good effect, and if skills are lacking, puts in place practices to counter this.

## **Environment**

Competency **Supports a successful business by ensuring the efficient use of water that enhances the quality of production, the health of humans and animals and environmental benefits**

Identifies the pollution risks that may impair water quality.

Identifies and reports leaks and implements emergency procedures to avoid wasting water.

Complies with any legal requirements for water use.

Assists with identification of areas where water could be saved.

Implements, mechanisms and techniques for collecting clean water.

Job title

## General farm worker

Identifies areas where water is lying on the surface, poaching problems are evident and erosion has occurred.

Complies with the legislative requirements for water use.

Follows relevant management practices to ensure soil erosion does not occur.

Identifies the main activities that may create a risk to water quality.

Follows an irrigation schedule to enhance crop growth and yield.

Recognises areas prone to flooding and drought.

Knows and understands how the business's waste water and effluent system works and ensures good practice on-business.

Knows and understands that pollution risk areas are a threat to water quality.

Knows and understands that soil erosion can be reduced through soil management techniques.

Knows and understands key points of legislation regarding water usage.

Follows plans for accurate applications of all inputs to ensure that water pollution is avoided.

## Quality and Control

Competency **Supports a successful business through application of knowledge and skills to control the quality of business production.**

Knows and understands the importance of traceability.

Knows and understands customer requirements and their impacts on crop production.

Knows and understands the procedures and controls to ensure all products meet the standards as stipulated in the Quality Assurance Manual and Food Safety Field Operations Manual.

Knows and understands customer requirements and their impacts on farm produce production.

Knows and understands the procedures and controls to ensure all products meet the standards as stipulated in the Quality Assurance Manual and Food Safety Field Operations Manual.

Knows and understands the importance of traceability.

Ensures all products meet the standards as stipulated in the Quality Assurance Manual and are delivered in a timely manner.

## Financial Management

Competency **Supports a successful business through knowledge and skills which ensure financial sustainability.**

Knows and understands benchmarking and key pieces of data for the business.

Develops and monitors own personal budgets and finances to achieve financial targets.

Knows and understands, in general terms, business income and expenses.

Knows and understands benchmarking and key pieces of data for the business.

Knows and understands, in general terms, business income and expenses.

Knows and understands the costs associated with jobs on-business.

Knows and understands the costs associated with jobs on-business.

## Environment and Soil/ Growing Media

Competency **Supports a successful enterprise through knowledge and skills that enhance sustainability of the business and the environment through careful management of the soil.**

Knows and understands the relevance of appropriate land drainage.

Job title

**General farm worker**

Sets up, calibrates and tests the range of equipment available, to ensure its in good and safe working order.

Complies with the business's nutrient management plan.

Ensures the appropriate range of equipment is available and in good working order.

Follows the management programme for growing crops

Prevents contamination of soil by disposing of waste products in line with legislation (waste regulations).

Knows and understands the relevance of appropriate land drainage.

Keeps up-to-date records for the nutrient management plan.

Complies with the regulations governing the control of pollution from relevant facilities and materials.

Carries out remedial drainage work, as required and instructed.

## **Environment**

Competency

**Supports a successful productive and sustainable business through knowledge and skills which promote good environmental practice.**

Assists with the identification of key habitats and audit biodiversity on the business.

Complies with requirements and consent conditions relating to pollution control.

Complies with Duty of Care and other waste regulations.

Demonstrates an awareness of, and complies with, the regulations governing the control of pollution from relevant facilities and materials on the business.

Follows plans and adheres to targets to reduce emissions and energy use.

Applies precision business techniques to optimise nitrogen fertiliser inputs to reduce whole business energy usage.

Assists with the monitoring of energy use and cost.

Recycles waste where possible and dispose of non-recyclable waste in accordance with best practice.

Ensures the optimal use of valuable by-products and separate clean and dirty water to minimise pollution risks.

Ensures waste is minimised and resources are used efficiently.

Fosters good relations with the local community to communicate the benefits of Integrated Farm Management (IFM).

Complies with the regulations around plastic waste (Reduce, Reuse, Recycle).

Assists with the creation of a plan to encourage greater biodiversity and conserve habitats, and involve staff and contractors in conservation planning and implementation.

Knows and understands the impact of key pollutants on the environment, animal and human health, and local communities.

Works safely and effectively to reduce environmental impacts.

Ensures that all legislation is complied with as instructed.

Knows and understands the principles of the waste hierarchy as related to the business and is able to adhere to the waste management plan.

Knows and understands that slurries and manures are not deemed as waste, if spread for agricultural benefit.

Demonstrates an understanding of, and willingness to apply, environmental management and Integrated Pest Management (IPM) principles.

Job title

**General farm worker**

Knows and understands the implications of the duty of care for EC Waste Framework Directive, Hazardous Waste regulations.

Knows and understands the rules and regulations concerning gun safety, and if appropriate, has a gun licence.

Knows and understands the legislation with regard to predators and vermin control.

Knows and understands the impact of Greenhouse Gas Emissions (GHGs) on climate change and the government agenda (Net Zero).

Knows and understands the legislation with regard to odour and the impact on neighbours.

Undertakes hedge cutting and ditch clearing to minimise the impact on flora and fauna.

## **Business Sustainability**

Competency **Supports and enhances a successful business through the use of knowledge and skills following strategic and operational plans.**

Knows and understands how to access business policies and procedures, and can effectively follow these as directed.

Identifies and acts on opportunities for operational improvement.

Knows and understands the value of accurate record keeping and effectively maintains records for which they have responsibility.

Knows and understands appropriate record keeping requirements as per business policy.

Knows and understands how to access business policies and procedures, and can effectively follow these as directed.

Knows and understands how their role and actions contribute to the efficiency of how the business operates.

Knows and understands appropriate record keeping requirements as per business policy.

Assists in improving the performance of the production system through good communication and operational best practice.

Knows and understands how their role and actions contribute to the efficiency of how the business operates.

Knows and understands the value of accurate record keeping and effectively maintains records for which they have responsibility.

## **Crop Production**

Competency **Supports successful crop production through applying knowledge and skills that assists with smooth planning of crop production.**

Demonstrates an awareness of choice of varieties relevant to conditions and market requirements.

Self assesses own skills to ascertain the need for familiarisation to prepare, test, calibrate and set up equipment.

Knows and understands the requirement for record keeping and maintains records appropriately.

Knows and understands the requirement for record keeping and maintains records appropriately.

## **Harvest**

Competency **Supports successful crop production through knowledge and skills which ensure successful harvesting and storage of crops at post-harvest.**

Knows and understands the requirements of the pre-defined sales programme and communicates any discrepancies to their line/business manager.

Works independently under exceptional circumstances such as equipment breakdown, inclement weather etc.

Job title

**General farm worker**

Carries out harvest operations, understanding quality and quantity expectations.

Ensures efficient production through modelling best practice and following business procedures.

Recognise when crop is ready for harvest.

Prepares and calibrates machines for harvest.

Assesses soil conditions before crop is harvested.

Knows and understands the requirements of the pre-defined sales programme and communicates any discrepancies to their line/business manager.

Knows and understands chemical and mechanical techniques for maintaining crop quality.

Knows and understands key points regarding health and safety requirements related to hygiene.

Knows and understands key points of relevant conservation requirements.

Stores crops in suitable conditions to maintain quality.

Knows and understands chemical and mechanical techniques for maintaining crop quality.

Knows and understands key points regarding health and safety requirements related to hygiene.

Knows and understands health and safety requirements related to vehicles on roads.

Knows and understands key points of relevant conservation requirements.

Knows and understands health and safety requirements related to vehicles on roads.

## **Plant Health and Productivity**

Competency **Supports successful crop production through knowledge and skills which maximise productivity and ensure plant health.**

Knows and understands legal, customer and employment procedures and Codes of Practice and commits to implementing them in the production of crops.

Knows and understands crop physiology and development process and how they affect crop management.

Knows and understands crop irrigation needs and how this affects yield.

Knows and understands relevant legislation and the basic principles of Integrated Pest Management and its practical application.

Knows and understands crop health and nutrition and is aware of relevant legislation and complies with them

Knows and understands the impact of key weeds, pests and diseases on the crop

Knows and understands crop physiology and development process and how they affect crop management.

Knows and understands legal, customer and employment procedures and Codes of Practice and commits to implementing them in the production of crops.

Ensures optimum digestate application as per agreed rates.

Identifies key weeds, pests and diseases and reports their presence.

Knows and understands relevant legislation and the basic principles of Integrated Pest Management and its practical application.

Ensures optimum fertiliser application as per agreed rates.

Knows and understands the impact of key weeds, pests and diseases on the crop

Complies with legal, customer and employment procedures and Codes of Practice and commit to implementing them in the production of crops.

Operates the irrigation equipment effectively through agreed procedures.

Job title

**General farm worker**

Ensures crops are grown to the required standards and specification, continuity, quality, volume and yield and meet the min standard requirements including relevant crop protocols and assurance schemes.

Knows and understands crop irrigation needs and how this affects yield.

Knows and understands crop health and nutrition and is aware of relevant legislation and complies with them

Ensures optimum organic manure application as per agreed rates.

## **Dairy specific**

Competency **Supports successful dairy production through knowledge and skills that ensure high milk quality.**

Undertakes operational tasks as instructed, in line with business policy and procedures to maintain milk quality.

Maintains hygiene in the milking parlour, milking plant, tanks and yards.

Knows and understands correct procedures if something goes wrong during milking such as if chemical accidents occur when cleaning milking machinery.

Knows and understands the impact of cattle health on milk production and understands the requirement to identify cows undergoing treatment and how to prevent milk that is unfit for human consumption from entering the milk storage tank.

Knows and understands the significance and causes and effects of somatic cell count (SCC), and mastitis in dairy cows.

Knows and understands the importance of clean PPE and good hygiene practices and knows the factors that affect milk quality, milk testing, milk cooling, and dairy company milk tanker tickets.

Knows and understands the impact of cattle health on milk production and understands the requirement to identify cows undergoing treatment and how to prevent milk that is unfit for human consumption from entering the milk storage tank.

Knows and understands the significance and causes and effects of somatic cell count (SCC), and mastitis in dairy cows.

Knows and understands the importance of clean PPE and good hygiene practices and knows the factors that affect milk quality, milk testing, milk cooling, and dairy company milk tanker tickets.

Knows and understands correct procedures if something goes wrong during milking such as if chemical accidents occur when cleaning milking machinery.

## **Nutrition**

Competency **Supports successful livestock production through knowledge and skills that ensure animals receive high quality feed regimes which sustainably enhance production.**

Knows and understands the importance of not letting stock graze following spraying until safe to do.

Knows and understands common poisonous weeds and the importance of correctly controlling with either agrochemicals or using hand held or mechanical equipment.

Knows and understands the main points of body condition measuring and can relate general condition of the stock to their age and stage of production.

Knows and understands how the feed requirements of an animal changes with their stage of production, and in the case of youngstock, by age and weight.

Knows and understands common poisonous weeds and the importance of correctly controlling with either agrochemicals or using hand held or mechanical equipment.

Knows and understands the type and amount of feed that should be on offer to the different ages classes of livestock and knows what good quality feed, and feed damage, looks like.

Job title

**General farm worker**

Knows and understands how the feed requirements of an animal changes with their stage of production, and in the case of youngstock, by age and weight.

Knows and understands the main points of body condition measuring and can relate general condition of the stock to their age and stage of production.

Observes in-shed feeding systems and reports issues to senior staff.

Assists with loading feed equipment, as directed.

Assist with the moving of fencing in the grazing system.

Assists with feeding livestock, as directed.

Assists with maintaining optimum grazing conditions, including weed control under direct and personal supervision and where appropriately licensed to do so.

Helps to ensure that animals receive adequate feed quantity and quality, including access to a daily supply of clean drinking water.

Knows and understands the type and amount of feed that should be on offer to the different ages classes of livestock and knows what good quality feed, and feed damage, looks like.

Knows and understands the importance of not letting stock graze following spraying until safe to do.

**Breeding**

Competency

**Supports successful livestock production through knowledge and skills that ensure successful breeding and birthing of livestock.**

Knows and understands the importance of adequate intake of colostrum within 6 hours of birth.

Knows and understands the signs of heat.

Knows and understands how to safely handle adult animals to reduce the risk of injury.

Knows and understands the basic principles of livestock selection and breeding for increased productivity.

Knows and understands key points of rearing requirements of young animals.

Knows and understands the signs of heat.

Follows farm protocol around health, welfare and hygiene requirements of new-born animals.

Knows and understands the importance of adequate intake of colostrum within 6 hours of birth.

Knows and understands how to safely handle adult animals to reduce the risk of injury.

Knows and understands the basic principles of livestock selection and breeding for increased productivity.

Knows and understands key points of rearing requirements of young animals.

Identifies different breeds and classes of livestock.

Assists with mating and mating management activities as directed, including observing and reporting on the behaviour/signals of animals.

Observes signs of birth and reports these to senior staff.

Implements good personal and animal safety regarding animal behaviour immediately after birth/hatching.

**Husbandry**

Competency

**Supports successful livestock production through knowledge and skills that ensure successful livestock husbandry.**

Knows and understands procedures for segregation within the group and the procedure for isolation away from the group if infectious condition suspected.

Complies with farm animal health plan/ policy, in particular biosecurity.

Demonstrates an attitude that is caring towards animals and assists with moving and handling livestock in a way that shows empathy and care for the animal.

Knows and understands the signs of female animals about to give birth and understands basic animal anatomy and the principles of how animals function.

Knows and understands the biosecurity risks presented by visitors, other animals and equipment shared with other farms, knows where visitors should park and disinfection practices.

Knows and understands the Five Freedoms. In particular, the moving of livestock and handling of livestock is done safely and with the minimum of stress and risk of injury to the animal and staff.

Knows and understands the importance of record keeping and recording everything as per animal health plan in the medicine book.

Knows and understands the signs of female animals about to give birth and understands basic animal anatomy and the principles of how animals function.

Knows and understands the procedures of humane slaughter including timeliness and correct methods of euthanasia for relevant livestock classes.

Knows and understands the importance of compliance with veterinary medicines storage requirements, accurate estimation of bodyweight, accurate measurement of dose, withholding periods, use by dates and use by after first opening dates and farm animal health

Knows and understands the importance of compliance with veterinary medicines storage requirements, accurate estimation of bodyweight, accurate measurement of dose, withholding periods, use by dates and use by after first opening dates and farm animal health

Assists with implementing or administering animal health treatments as directed.

Knows and understands the basic signs of health and basic signs of disease and typical normal and abnormal behaviours.

Knows and understands the importance that husbandry activities such as foot bathing, foot trimming, vaccination and routine worming play in maintaining animal health and welfare and preventing disease.

Knows and understands the procedures of humane slaughter including timeliness and correct methods of euthanasia for relevant livestock classes.

Knows and understands the importance of record keeping and recording everything as per animal health plan in the medicine book.

Knows and understands the basic signs of health and basic signs of disease and typical normal and abnormal behaviours.

Knows and understands the importance that husbandry activities such as foot bathing, foot trimming, vaccination and routine worming play in maintaining animal health and welfare and preventing disease.

Knows and understands the biosecurity risks presented by visitors, other animals and equipment shared with other farms, knows where visitors should park and disinfection practices.

Knows and understands the Five Freedoms. In particular, the moving of livestock and handling of livestock is done safely and with the minimum of stress and risk of injury to the animal and staff.

Keeps records of animal treatments in line with farm protocols and procedures.

Assists senior staff with calving/lambing/farrowing, as directed.

Recognises when stock do not respond to treatment or where sickness or injuries require emergency euthanasia and promptly refers these to senior staff and/or carries out euthanasia if appropriately trained and confident, as per agreed farm animal health plan

Recognises sickness or injuries to animals that require attention and promptly refers these to senior staff and/or administers treatment if appropriately trained and as per agreed farm animal health plan.

Job title

**General farm worker**

Recognises normal livestock health and identifies key health issues and abnormal behaviour, and reports these to senior staff.

Knows and understands procedures for segregation within the group and the procedure for isolation away from the group if infectious condition suspected.

## **Waste management**

Competency **Supports successful livestock production through knowledge and skills that ensure the effective management of animal waste, in line with legal requirements.**

Knows and understands the legal requirements for correct storage and disposal of animal carcasses.

Knows and understands farm procedure in relation to disposal of used disinfectants, used sheep dips and storage of out of date medicines.

Knows and understands farm procedure in relation to disposal of used disinfectants, used sheep dips and storage of out of date medicines.

Knows and understands how liquid farm manure and effluent systems operate, and knows their responsibilities and what happens if problems occur.

Knows and understands environmental protection practices of the system used for handling and storing both solid and liquid farm manures and effluents.

Knows and understands the legal requirements of handling and storing both solid and liquid farm manures and effluent, and how effluent can impact the environment.

Correctly stores animal carcasses awaiting disposal and prevents access from other animals.

Knows and understands the legal requirements for correct storage and disposal of animal carcasses.

## **Beef, Dairy**

Competency **Supports successful production of cattle through knowledge and skills that support and enhance the business.**

Knows and understands the methods for disbudding and that anaesthetic must be used, and that chemical cauterisation can be undertaken in the first week of life only.

Knows and understands that castration without anaesthetic can be carried out with rubber ring within the first week of life only.

Assists with calf disbudding.

Assists with bull calf castration.

Carries out tagging following procedures.

Knows and understands the methods for disbudding and that anaesthetic must be used, and that chemical cauterisation can be undertaken in the first week of life only.

Knows and understands the requirements for tagging and why it is important.

Knows and understands that castration without anaesthetic can be carried out with rubber ring within the first week of life only.

Knows and understands the requirements for tagging and why it is important.

## **Dairy specific**

Competency **Supports successful production of dairy production through knowledge and skills that ensure efficient milking which enhances business.**

Knows and understands the farms system for marking cows, reasons for those markings, and knows how to manage herds correctly during milking.

Job title

**General farm worker**

Knows and understands how a milking parlour operates, and is able to carry out simple milking tasks. Knows safe practices during milking such as stretching to reduce injury and RSI, self protection from animals.

Knows and understands how to bring cows to the parlour for milking, including the proper use of backing gate if applicable.

Knows and understands the farms system for marking cows, reasons for those markings, and knows how to manage herds correctly during milking.

Knows and understands how a milking parlour operates, and is able to carry out simple milking tasks. Knows safe practices during milking such as stretching to reduce injury and RSI, self protection from animals.

Knows and understands how to bring cows to the parlour for milking, including the proper use of backing gate if applicable.

Ensures that calves have colostrum quickly and that it doesn't go into the milk tank.

Assists with in-parlour feeding where applicable.

Milks cows correctly and evenly, and trains heifers for milking correctly.

Assists with the cleaning and maintenance of the milking parlour, any automatic milking systems, milk pipeline, milk cooling and storage equipment.

Assists with making sure cows are milked and exit the parlour in the most time-effective way, as directed.

**Pork**

Competency **Supports successful production of pork through knowledge and skills that support and enhance the business.**

Knows and understands how to identify different breeds of pig.

Assists with the assessment/response to ventilation and environmental needs

Knows and understands the consequences of poor semen storage.

Knows and understands the consequences of poor semen storage.

Stores and uses livestock semen appropriately.

Assists with artificial insemination on livestock/ and the supervision of natural mating.

Knows and understands how to identify different breeds of pig.

**Lamb**

Competency **Supports successful production of sheep through knowledge and skills that support and enhance the business.**

Knows what method is used on farm including plunge dipping, sheep shower, jetter or pour-on. Understands to minimise contact with treated animals.

Carries out electronic identification device tagging procedures under supervision.

Assists with tail docking and castration under supervision.

Assists with external parasite control by the application of veterinary medicine/ pesticide to the outside surface of the sheep.

Assists with foot-trimming.

Knows when foot trimming should be carried out and why it is important

Knows when foot trimming should be carried out and why it is important

Understands wet-adoption and why it's used

Understands to symptoms of hypothermia (low body temperature) in lambs and the need to take action to warm the lamb

Job title

**General farm worker**

Knows that tail docking and castration too early can interfere with lamb suckling and prevent adequate colostrum intake

Knows that tail docking and castration can be carried out with rubber ring within the first week of life only

Knows that the electronic (yellow) tag should be placed in the left ear and that lambs destined for slaughter before 12 months of age need the electronic tag only.

Assists with crutching or dagging.

Knows when crutching or dagging should be carried out and why it is important

Knows what method is used on farm including plunge dipping, sheep shower, jetter or pour-on. Understands to minimise contact with treated animals.

Understands wet-adoption and why it's used

Understands to symptoms of hypothermia (low body temperature) in lambs and the need to take action to warm the lamb

Knows that tail docking and castration too early can interfere with lamb suckling and prevent adequate colostrum intake

Knows that tail docking and castration can be carried out with rubber ring within the first week of life only

Knows that short docking of tails is not allowed. Knows that docked tail length must cover at least the anus of males and at least the vulva of females

Knows that the electronic (yellow) tag should be placed in the left ear and that lambs destined for slaughter before 12 months of age need the electronic tag only.

Knows when crutching or dagging should be carried out and why it is important

Prepares the animal for shearing/wool handling.

Knows and understands how to identify different breeds of sheep.

Knows that short docking of tails is not allowed. Knows that docked tail length must cover at least the anus of males and at least the vulva of females

Knows and understands how to identify different breeds of sheep.

**Technology, Machinery and Vehicles**

Competency **Supports successful technical operations through knowledge and skills of technology, machinery, vehicles and structures that enhances production and business viability.**

Knows the importance technology plays within the industry and the opportunities available to them to use technology.

Knows and understands how electronic systems work on-farm and what their role is.

Knows and understands the value of collecting good quality data and how it can be used to make decisions.

Ensures familiarity with key locations.

Knows and understands how to use technology-based systems to collect data to improve efficiency of operations.

Knows and understands basic vehicle maintenance and operation, including setting up and calibration to achieve required results.

Knows and understands how to use technology-based systems to collect data to improve efficiency of operations.

Knows and understands how to operate machinery safely.

Knows and understands the business security process.

Knows and understands basic vehicle maintenance and operation, including setting up and calibration to achieve required results.

Knows the importance technology plays within the industry and the opportunities available to them to use technology.

Knows and understands how electronic systems work on-farm and what their role is.

Knows and understands how to safely operate a light utility vehicle (LUV), with trailed equipment or a mounted load, on flat or hilly terrain.

Knows and understands the business policy around use of mobile and smart phones for business and personal use at work.

Knows and understands how to select correct fuel when operating vehicles and machinery.

Knows and understands how to adapt their driving giving due care, respect and attention to conditions (slope, wet, etc), risks (overhead power cables, low buildings etc) and when towing loads.

Knows and understands how to safely operate a light utility vehicle (LUV), with trailed equipment or a mounted load, on flat or hilly terrain.

Knows and understands how to select correct fuel when operating vehicles and machinery.

Knows and understands which driving licences are needed and when the renewal period is due, relevant to the job.

Knows and understands how to operate machinery safely.

Knows and understands the business policy around use of mobile and smart phones for business and personal use at work.

Knows and understands the value of collecting good quality data and how it can be used to make decisions.

Follows effective building management practices as per business policy and procedures.

Knows and understands how to adapt their driving giving due care, respect and attention to conditions (slope, wet, etc), risks (overhead power cables, low buildings etc) and when towing loads.

Applies the value of collecting good quality data and how it can be used to make decisions.

Knows and understands the business security process.

Demonstrates familiarity with range of other technologies and aids on the farm.

Identifies problems, faults and inconsistencies requiring action.

Applies the value of collecting good quality data and how it can be used to make decisions.

Demonstrates confidence linking technology with implements, computers, smartphones and apps, etc and collect data to improve efficiency and accuracy of operations.

Demonstrates confidence using computers, smartphones, and apps, and uses technology-based systems to collect data to improve the quality of the workplace where applicable.

Demonstrates experience using computers, smartphones, and apps.

Uses and looks after fencing tools effectively.

Holds a current and relevant driver's licence.

Knows and understands which driving licences are needed and when the renewal period is due, relevant to the job.

Ensures familiarity with farm layout.

Demonstrates appropriate instruction, training and certificates for driving vehicles used on farm.

Wears a suitable helmet when using an ATV.

Checks and drives a basic wheeled tractor with an attached implement on flat or hilly terrain.

Develops strategies to manage personal and external factors that may contribute to injury at work.

Job title

**General farm worker**

Ensures responsible driving giving due care, respect and attention to others on site and on roads.

Holds certificates or undertakes training with other farm machinery applicable to role.

Holds certificates where needed and has undergone appropriate training to operate storage, warehouse and packhouse machinery used on farm.

Assists with erecting, maintaining and repairing electric and non-electric fences, walls and other boundaries and field separation features, as directed.

## **Environment**

Competency **Supports successful technical operations with knowledge and skills which ensures sustainable land use that enhances business and the environment.**

Knows and understands the need for efficient use of water.

Assists with water-related tasks.

Knows and understands that no stock are allowed in or around waterways, and reports any stock in areas they should not be to senior staff.

Knows and understands how to dispose of and tidy up farm waste.
